| 1. Harshal Meshram | -IIT2019104 (GROUP REPRESENTATIVE) |
| 2. Shivansh Gupta  | -IIT2019107                        |
| 3. Saloni Thakral  | -IIT2019128                        |
| 4. Aditya Kumar    | -IIT2019144                        |

# INSTRUCTIONS FOR EXECUTING AND SPECIFIC REQUIREMENTS

- To run the project extract the ZIP (**PROJECT.zip**) file shared.
- Open folder named '**dist**' . (**/ToiletManagement/dist**)
- All the codes of classes are present in the '**src**' (**/ToiletManagement/src**) folder of the project folder itself.

**Note:** If '**database**' folder is missing in the '**dist**' folder. Run the jar file first then close it .This will create a '**database**' folder in the '**dist**' folder along with some readme files . Then replace the '**database**' folder in '**dist**' folder (**/ToiletManagement/dist**) with the '**database**' folder from root folder of the project (**/ToiletManagement/database**)

**ABOVE IS NOT NECESSARY BUT FOR BETTER USAGE OF THE PROJECT PLEASE COMPLY .**

- Run the jar file named '**ToiletManagement.jar**' in the '**dist**' folder of the project folder.
- While Registration please enter '**A VALID EMAIL ID**'. (All fields are mandatory)  
Click on the **right arrow** to continue .  
**Wait for some time for the processing of the Mail** . (You will be notified )

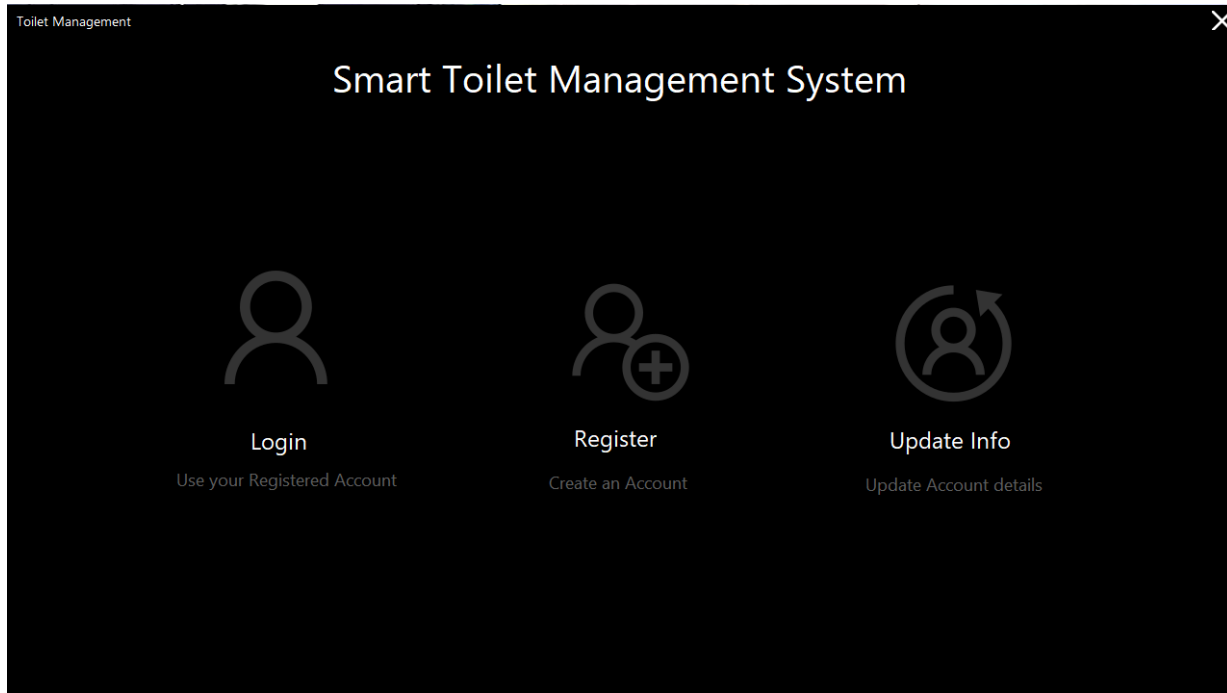

Verify with the **Verification Code** provided in the **Mail**.

**A Unique ID** will be provided in the **Mail** by the administration for your login after **SUCCESSFUL REGISTRATION**.

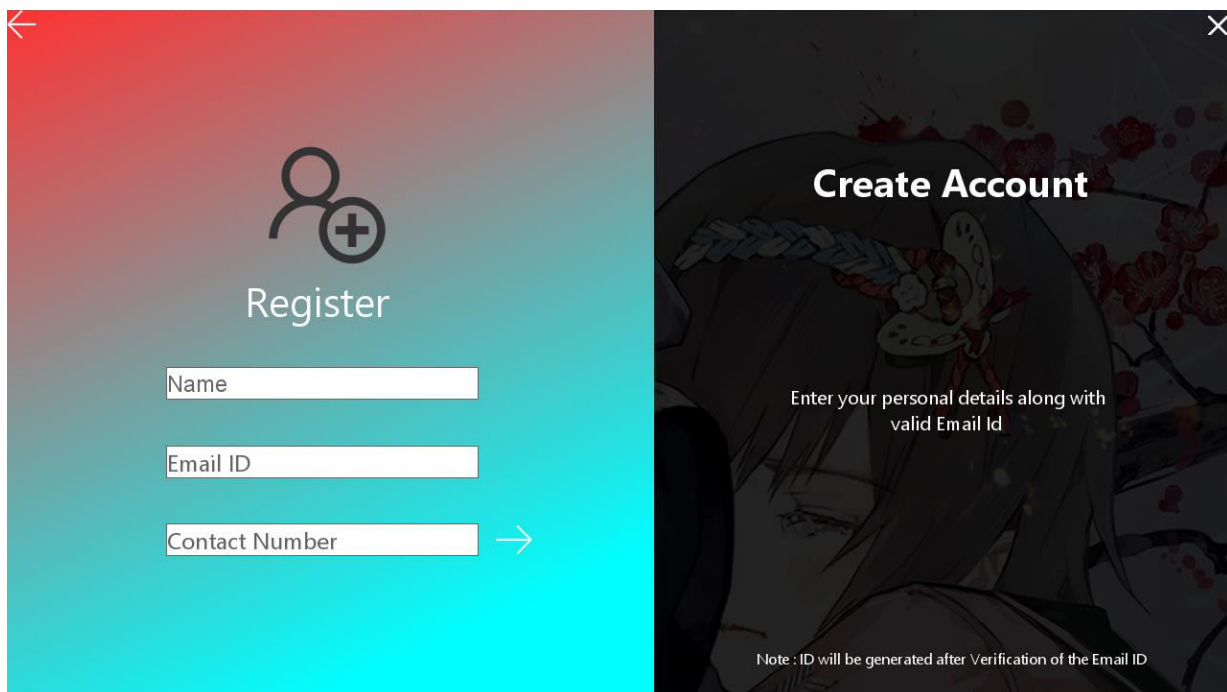

- For **schema generation and table**, there is **no** need for execution of any type of scripts.
  - Because We have added that in the code itself, in '**src**' folder (**DatabaseHandler.java**)
  - **So that it creates an embedded database if there is no database.**
  - It also created a table in the database also if there is no table.
  - The names of database is '**database**' and the tables present are:
    - LOGIN
    - MAINTENANCE
    - TOILET
    - THRESHOLD
    - TL01 ..... TL24
    - TL01M ..... TL24M

# GUIDE TO USING THE SMART TOILET MANAGEMENT SYSTEM

Explained using the screenshots of the project.

€ The register button on the MAIN PAGE redirects you to the REGISTRATION PAGE.

€ In the REGISTRATION PAGE after entering your details and submitting, it will send a confirmation code which you will need to register . Following this you will also receive an email regarding successful registration.

- ⌘ While registration please enter 'A VALID EMAIL ID', you can't register with the same email id for more than one time.
- ⌘ After Registration you will be redirect to LOGIN PAGE  
Enter the **UNIQUE ID** provided in the Trailing **MAIL**

## Welcome Back!

To Keep Connected login with the registered Name and ID

### Login

→

⌘ After logging in Successfully you will be redirected to the **CLEANING SYSTEM PAGE**.  
This page shows you the log for **each respective toilet at top** along with the **current NTU and MQ2 values in a table below**. Toilet codes having red color show that they need cleaning i.e the sensor values are above **THRESHOLD** and green colored depicts the NTU and MQ2 values are below **THRESHOLD**.

- € You can configure the threshold value of MQ2 and NTU values in **HygieneConfig** page.  
Click on the **Help Icon** (top right) for Information on the **NTU and MQ2 Values**

Threshold NTU Value

78.0  →

Threshold MQ2 Value

3765.0  →

$\notin$ 

This page contains information regarding the consumables like hand wash liquid dispenser , tissue towel quantity along with toilet paper quantity (Quantity in Grams) . It also contains the percentage of trash bin occupied . Toilet codes with red color denote either any of the consumables are empty / less or the trash bin is full / about to be filled .

Table at top denotes the values of every consumable and trash at particular time intervals while the bottom table contains current values of consumables and trash capacity.

**NOTE:** New data is entered in the tables after every **1 MINUTE** .

**PLEASE WAIT FOR ATLEAST A MINUTE BEFORE REFRESHING THE PAGE .**

- Personal Information can be Changed either from **MAIN PAGE** or **UPDATE INFO PAGE**
- REGISTERED ACCOUNT** can be **DELETED** From **UPDATE INFO PAGE** (question icon)
